

## British Standard for Vehicle First Aid Kits BS8599-2

Using the latest data, including accident and research statistics used in F1 racing car design, Industrial and Medical Professionals have produced a new standard to meet the medical needs of road traffic victims during the critical period prior to the arrival of the Emergency Services. Components have been specifically selected for ease of use, and for coping with (without any special training) both minor and major road traffic accident injuries. To account for various types of vehicle and passenger carrying capability, the BS8599-2 kit is available in three sizes. Whether a Motorcycle, Bus, Van, or Double Decker Bus, there is a suitable kit. The size and the quantity of kits for any vehicle, is determined by the vehicle type and passenger numbers.

### SMALL VEHICLE FIRST AID KIT BS8599-2 COMPLIANT

For moped,  
motorcycle,  
motor tricycle,  
and quadricycle.  
(maximum 3 passengers)
